Parts Price List

HUDSON "33"

1911

The Prices in this List supersede those published prior to date of this edition.

Prices quoted herein are subject to change without notice.

Revised Edition April 1913

Hudson Motor Car Company
Detroit, Michigan

HUDSON dealers who carry an adequate supply of repair parts in stock, find that such provision helps materially in closing sales. Both owners and prospective purchasers of HUDSON cars are influenced by the dealer's ability to care for their wants.

The value of an automobile is in proportion to the continued service which it renders to its owner. If it must be laid up awaiting the arrival of some repair part from the factory, which should have been kept in stock by the dealer, the owner has been delayed and his enthusiasm for the HUDSON car has diminished proportionally.

All HUDSON dealers are expected to carry in stock a sufficient number of repair parts to meet all ordinary demands, and all HUDSON owners alike are entitled to prompt service in this respect at the hands of the dealers from whom they purchased their cars.

Repair parts may be obtained directly from most of our dealers except where the stock has become depleted due to oversight or to an unusual demand for the particular part wanted. In cases of this kind, the parts may be ordered by the owner through our dealer, or if time can be saved may be ordered direct from the factory. As we do not open accounts with other than HUDSON dealers, direct shipment of parts from the factory to an owner is always sent C. O. D.

The parts shown on pages 54 to 59 of this catalogue are standard and can be obtained from almost any hardware store, or automobile supply house in the country. You will doubtless save time and transportation charges by purchasing from them when possible.

We do not open accounts with other than HUDSON dealers

How to Order Parts

The prices indicated in the following list are subject to change without notice. They are f. o. b. Detroit, Michigan.

Parts ordered by a dealer for an owner will be billed to the dealer unless the owner desires C. O. D. shipment.

HUDSON dealers aim to carry sufficient stock to meet all ordinary demands. Should they be unable to supply what is wanted, the owner may telegraph or write direct to the factory for same.

When ordering parts direct from the factory always address

Hudson Motor Car Company

Parts Order Department

Detroit, Mich.

In placing orders for parts, always refer to them by the full catalogue number shown at the extreme left of each page describing the parts. In addition, always give the name of the part in full. You cannot be too explicit in writing your specifications. Describe the part fully and ALWAYS GIVE CAR NUMBER WITH THE ORDER. The car number will be found on a brass plate attached to heel board of rear seat.

Orders for painted parts should always indicate the color wanted.

Orders for fenders should indicate whether for front or rear, right or left, what tread, and what model.

Orders for front or rear axle should indicate whether for 55-inch or 60-inch tread.

Orders should be made out on regular order blanks provided by this Company. All of our dealers are supplied with these.

Telegraphic orders are hard to interpret. Remember we cannot execute your order correctly unless it is accurate and very complete. It cannot be guessed at.

When ordering parts to be sent to more than one address, send separate orders covering the different shipments.

We cannot be held responsible for errors and delays caused by inaccurate and incomplete information, therefore you cannot be too careful in making out your order.

Practically all errors made by our Parts Order Department are due to incomplete or inaccurate information contained in the order which we receive. Enable us to eliminate the possibility of errors by being very particular in making out your specifications.

When Claims Are Made for Allowance

We cannot make allowance on parts which are claimed to be defective unless they are returned to our factory for inspection. Pay for the new part which is to replace the one supposedly defective. Return the old parts promptly and just allowance will be made, providing they are found defective by our inspectors. Parts returned for credit must be sent prepaid and tagged with the name and address of the shipper. Unless these charges are prepaid, the package will be refused. In returning parts under the above conditions, always advise us promptly at the time of shipment, giving us full information regarding the parts and the condition under which the defect was called to your attention.

HUDSON MOTOR CAR COMPANY

In Ordering by Telegraph

Below is a code which will greatly reduce the length of telegrams if you find occasion to order parts in this way. Please use this code. It will save expense and time.

Instructions as to Manner of Shipment

Always specify in your order whether you desire parts sent by mail, express, freight or included with carload shipment of cars. If this matter is left entirely to our judgment, we shall be governed largely by the item of expense to the owner or dealer.

All packages weighing 11 pounds or less and shipped on open account to our regular dealers will be sent by Parcels Post unless otherwise ordered. If insurance against loss (not to exceed \$50.00) is desired, an additional postal charge of ten cents will be made. In ordering, indicate whether insurance is wanted.

All packages shipped under collect charges are sent by express.

We cannot be held responsible for delay or damage to merchandise while in transit. Our responsibility ceases upon delivery of shipment to the transportation company. The company's receipt for same is evidence that the material is in good condition when it leaves our custody.

Suggestions to the Dealer

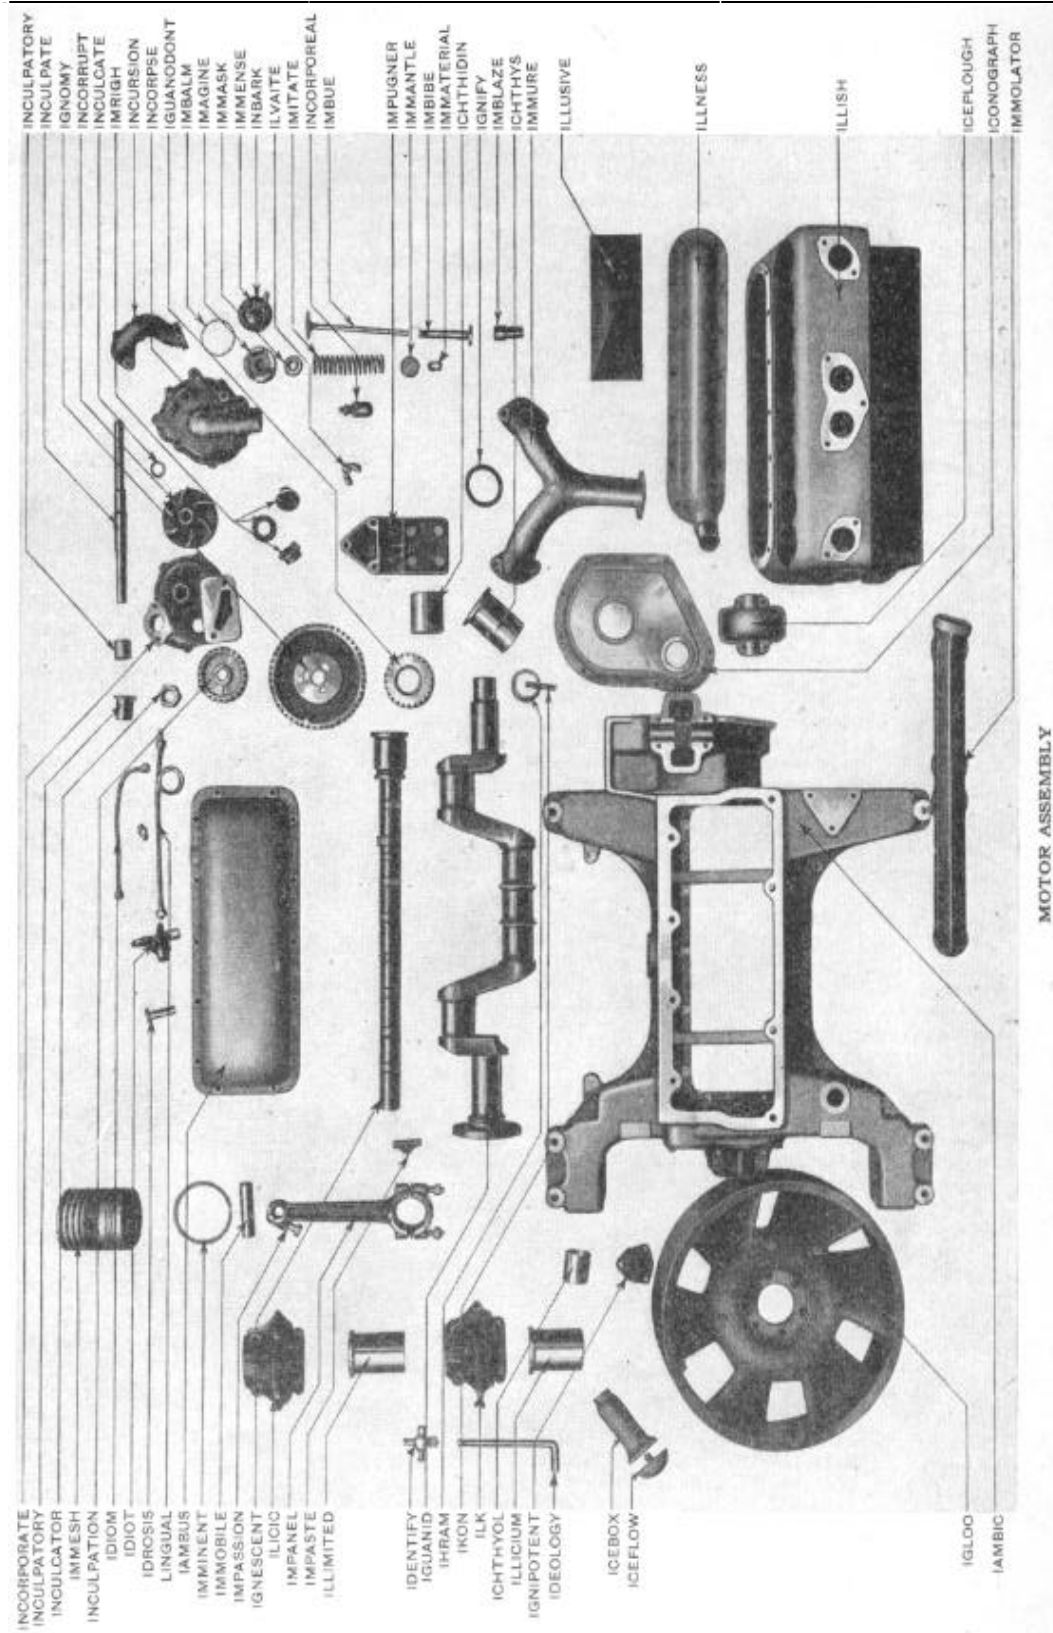

Very often parts are needed for a car and are ordered by the dealer without first consulting with the owner. The dealer should always communicate with the owner of the car before the part is either ordered or placed upon the car. Not knowing that such a part is to be used the owner frequently objects to the price charged, whereas if the matter had been taken up previously, he would have authorized the extra cost and thus a disagreeable dispute would have been avoided.
