HUDSON SUPER-SIX PARTS LIST

November, 1925

IMPORTANT

The prices established in this Parts Price List are on such a reasonable basis that there should be no incentive to purchase inferior parts.

The use of genuine Hudson parts will insure the satisfactory operation of your car.

Three are Hudson-Essex distributors and dealers in all principal cities and towns, who will supply genuine Hudson parts.

For your own protection, insist upon obtaining genuine Hudson parts.

Prices subject to change without notice

Some of the Items listed herein are automobile parts and accessories (identified by an asterisk on factory's invoices), while others are commercially usable merchandise. Of the net amount at which automobile parts and accessories are charged to purchasers by the Hudson Motor Car Company 40/41 represents the price of the goods and 1/41 represents excise tax.

Parts which have never previously been used are designated with a † in number required per car column.

Caution

Specify Genuine Hudson Parts When Repairs Are Necessary

When a motor car is repaired the usual operation is that certain worn parts are taken from it and new parts installed in their place. The car is thus renewed for continued service.

It is obviously important that the replacements should be identical with the ones removed and that the installation should be made by men specially trained for this particular work.

However, there are on the market many counterfeit parts which are sold within the trade on long wholesale discounts. The owner pays the top price.

Our own Metallurgical Department has examined many such parts. They are lacking in the elements which make for long life. Often they are inaccurately made, and in some instances several ounces heavier or lighter than the replaced parts, which has an injurious effect on the balance, smooth-running and endurance of the car.

Another type of parts often urged for sale are so-called "special parts" such as piston rings, carburetor accessories or added or substitute electrical equipment. Miraculous results are promised the car owner if he will install these various devices. The sad fact is that these results do not materialize. Sometimes these various special parts are almost as good as the ones already in the car. But they are not built for the specialized requirements of our own cars, as are the standard parts carried by Hudson and Essex dealers.

To protect yourself and your automobile investment you will find it best to have all repair work done with genuine Hudson parts at an authorized Hudson and Essex Service Station. If you wish to make minor repairs yourself, or circumstances make it impossible for you to have the work done at an authorized Hudson and Essex Service Station, be sure that genuine Hudson parts are used.

To take any other course is to invite difficulty and dissatisfaction.
