TO ALL DEALERS AND SERVICE STATION AGREEMENT HOLDERS:

SELL. . .Engine Cooling Service during September, October and November, as this Service is profitable and easy to sell,

SELL. . .

Engine Cooling Service is highly recommended by the SERVICE DIVISION of the HUDSON MOTOR CAR COMPANY before adding Anti-Freeze, as summer accumulation of rust., scale and sludge will impair the operation of the Cooling System if not removed from the radiator.

ENGINE

If this is fully explained to every car Owner that visits your service shop or parts counter during the next three months, the greater majority will purchase this Cooling Service either through your service shop or at retail level.

COOLING

SERVICE

The eye-catching wall card (copy attached) displayed at your service write-up desk is designed to invite many inquiries on Engine Cooling Service with Hudson Approved items. This merchandising piece is also the cover of the Fast Moving Parts Order Pad for September and can be detached for display at the Parts Department. Don't overlook the sales value of an attractive display of Cooling Service items, using the merchandising card as an eye-stopper.

TO DEALERS AND SERVICE STATION AGREEMENT HOLDERS:

We are pleased to introduce the newest and ... finest Chrome Piston Ring Set for Service Replacement on the market today HUDSON "KROMEX" PISTON RING SET.

Hudson "Kromex" Piston Rings have many points of superiority not found in other chrome ring sets such as:

1. A heavy body of chrome on the upper compression ring that doubles resistance to heat, corrosion,, friction, scuffing and border-line lubrication,
2. The upper oil ring has the exclusive full-flow spring with a heavy layer of chrome added to the steel segments, thereby reducing friction and doubling life of the ring. Oil rings are further improved by GRANOSEALING sides of the steel segments, thus each section has independent flexibility giving better oil control, even to badly tapered and out-of-round cylinders.

The automotive trade will be informed of Hudson "Kromex" Piston Ring Sets in the September 29th issue of Automotive News (copy enclosed) and October 15th issue of Automotive Industries.

Also enclosed is an attractive three-color 42" x 20" wall poster for Dealers to display in their Service Shops announcing Hudson "Kromex" Piston Ring Sets to their Owners. Included is a four page brochure giving full data on Hudson "Kromex" Piston Ring Sets.

Zones and Distributors now have Hudson "Kromex" Piston Ring Sets in stock. Use the attached order blank TODAY for ordering your initial supply.

TO PUT IT SIMPLY, "KROMEX" IS THE FINEST PISTON RING SET EVER PRODUCED FOR SERVICE REPLACEMENT
