TELEGRAPH CODE

The following TELEGRAPH CODE phrases are offered for the convenience of Zones and other Distributors in ordering parts and transacting parts business with the Factory Parts Department.

WUPTA	Ship to us by Air Express
WUPRY	Ship to us by Air Mail
WUPAF	Ship to us by Air Freight
WUPMU	Ship to us by Parcel Post
WUPOW	Ship to us by Parcel Post Special Delivery
WUPAH	Ship to us by Express
WUPIP	Ship to us by Freight
WUPHO	Ship to us by Motor Truck
WUSAF	Charge our account and ship by Air Express to-
WUSDI	Charge our account and ship by Air Mail to-
WUSMA	Charge our account and ship by Air Freight to-
WUSEJ	Charge our account and ship by Parcel Post to-
WUSIN	Charge our account and ship by Parcel Post Special Delivery to-
WUSJO	Charge our account and ship by Express to-
WUSTY	Charge our account and ship by Freight to-
WUSVA	Charge our account and ship by Motor Truck to-
WUTAE	Ship C.O.D. by Air Express to-
WUTIM	Ship C.O.D. by Air Mail to-
WUTAN	Ship C.O.D. by Air Freight to-
WUTKO	Ship C.O.D. by Parcel Post to-
WUTOT	Ship C.O.D. by Parcel Post Special Delivery to-
WUTPU	Ship C.O.D. by Express to-
WUTWA	Ship C.O.D. by Freight to-
WUTYC	Ship C.O.D. by Motor Truck to-
WUUBE	We will call and pick up parts
WURCI	When and how (will or did) you ship parts called for in our telegram of -
WUROV	When and how (will or did) you ship parts called for in our letter of -
WURNU	When and how (will or did) you ship parts called for in our order of (or number)
WUUF1	Ship to us by prepaid freight order number

WARRANTY

"We warrant each new car manufactured by us to be free from defects in material and workmanship under normal use and service, our obligation under this warranty being limited to making good at our factory any part or parts thereof, including all equipment or trade accessories (except tires) supplied by the Car Manufacturer, which shall, within ninety (90) days after making delivery of such vehicle to the original purchaser, or before such vehicle has been driven 4,000 miles, whichever event shall first occur, be returned to us with transportation charges prepaid, and which our examination shall disclose to our satisfaction to have been thus defective; this warranty being expressly in lieu of all other warranties expressed or implied, and of all other obligations or liabilities on our part, and we neither assume nor authorize any other person to assume for us any other liability in connection with the sale of our vehicles.

"This warranty shall not apply to any vehicle which shall have been repaired or altered by other than an Authorized Hudson dealer in any way so as, in the judgment of the Manufacturer, to affect its stability or reliability, nor which has been subject to misuse, negligence or accident."

HUDSON MOTOR CAR COMPANY

DETROIT, MICHIGAN

U. S. A.

The Hudson Motor Car Company reserves the right to make any changes in or improvements on its products without incurring any liability or obligation whatever, and without being required to make any corresponding changes or improvements on products theretofore manufactured or sold.

1952 CHASSIS MODELS

Model No	Model Name	W/Base	No. Cyl.	Cylinder Displacement	Bore - Stroke	Starting Car. No.
4B	Pacemaker	119	6	232	3-9/16 x 3-7/8	4B-132974
5B	Wasp	119	6	262	3-9/16 x 4-3/8	5B-132924
6B	Commodore 6	124	6	262	3-9/16 x 4-3/8	6B-133118
7B	Hornet	124	6	308	3-13/16 x 4-1/2	7B-132916
8B	Commodore 8	124	8	254	3 x 4-1/2	8B-133106

When reading the serial or engine number, which are identical, of any 1952 Hudson car remember the first number and letter denotes the chassis model as outlined above.

The remaining numerals comprise the actual serial number of the car, and these figures run in a single series regardless of model.

The serial number is stamped on a metal plate fastened to the right front door hinge pillar. It may be observed by opening the right front door.

ENGINE NUMBERING SYSTEM

On six cylinder engines, the engine number, which is the same as the car serial number is stamped vertically on the side of the engine block at the upper right hand corner.

On eight cylinder engines, the engine number, which is the same as the car serial number, is stamped on the top of the cylinder block between numbers one and two exhaust manifold flanges.

COLOR CODE

To identify the original color of a Hudson car when manufactured, numerals will appear on the body half of the right front door upper hinge. They may be observed when the door is opened. To determine the color obtain the code and serial number of car, then consult section UU of the 1952 Parts Catalogue where complete information in regards to lacquer finishes has been compiled.

Colors having numerals for identification purposes do not require serial numbers to insure proper lacquer being obtained

Once a number is assigned to a single color or a two-tone combination it will always identify the color to which it was originally assigned and no other.

This Parts Catalog is arranged in two major divisions, Chassis Parts Groups and Body Parts Groups

For ease in locating desired parts the Chassis Division is broken up into twenty main groups, each of which is designated by a letter. The Body Division is divided into sixteen main groups, each designated by a double letter.

Groups in both the Chassis and Body Divisions are further broken down into smaller groups by the addition of numbers to the main group letter or letters. In the Front Suspension Group A the Steering Arms will be found in group A5. In the Front End Group of the Body Division the Dash Panel assembly will be found in group AA5, etc.

The twenty main groups of the Chassis Division follow:

A FRONT SUSPENSION	L PROPELLER SHAFT
B REAR AXLE	M STEERING GEAR AND DRAG LINK
C BRAKES AND BRAKE CONTROL	N FUEL SYSTEM
D PEDALS	P MUFFLER AND EXHAUST PIPE
E WHEELS	Q RADIATOR AND HOSE CONNECTIONS
F SPRINGS AND SHOCK ABSORBERS	R SHEET METAL - HOOD, FENDERS, ETC.
G FRAME AND BUMPERS	S ELECTRICAL
H ENGINE	T INSTRUMENT PANEL FITTINGS
J CLUTCH AND CONTROL	U TOOLS AND ACCESSORIES
K TRANSMISSION AND CONTROL	Z SPECIAL UNITS

In a similar manner, body parts are grouped in sixteen main groups which are explained at the start of the Body Division on Page 163.

The main groups are arranged in the book in alphabetical order. The letter designating each group appears at the top corner of each page. Across the page from the letter appears the name of the group. On the following page appears a complete explanation of the group breakdown.

DIVISION OF CHASSIS GROUPS

		Page No.			Page No.

S-11	Ignition coil and lock	131		Fuel pump-standard	154
S-12	Battery	131		Fuel pump-combination	155
S-13	Switches and circuit breakers	132		Starting motor	157
S-14	Horns	132		Distributor-six cylinder	160
S-15	Direction indicator	133		Distributor-eight cylinder	161
S-16	Spot, fog and back-up lights	133		Generator	156

The main sections follow each other in alphabetical order, and the small groups are arranged in numerical sequence. This provides a simple means of identifying a part from its illustration number.

Each illustrated part is given an illustration number. This number is a combination of the group number and an extra number which designates that particular part. For example, the Tie Rod Clamp (153502) is shown on illustration 3 as A6-3, and the Front Stabilizer Torsion Bar (300586) is shown on illustration 1 as A8-1.

To find the part number and name of a part which has been located on the illustration, first turn to the group indicated by the first part of the illustration number (before the dash), then follow down the group to the particular part as shown by the last part of the illustration number.

In order that the illustration of a part may be quickly found from its part number or description, the number of the illustration on which the part is pictured is shown in the column immediately to the left of the part number.

DIMENSIONS

Wheelbase - Pacemaker.....	119"
Wheelbase - 5A, 6A, 7A, 8A.....	124"
Overall Length - including bumpers - Pacemaker.....	201-1/2"
Overall Length - including bumpers - 5A, 6A, 7A, 8A.....	208"
Overall Width - All models.....	77-1/16"
Overall Height - All passenger cars.....	60-3/8"
Road Clearance - front and rear.....	8-1/8"
Turning Radius -	
4B-5B - right turn.....	19'-8" - left turn.....19'-8"
6B-7B-8B- right turn	21'-2" - left turn.....20'-5"

CAPACITIES

Gasoline Tank - All models.....	20 U.S. gallons
Cooling System - less Heater.....	18-1/2 U.S. quarts
Cooling System - with Heater.....	19-1/2 U.S. quarts
Crankcase - Total - Six cylinder.....	7-1/2 U.S. quarts
Crankcase - Total - Eight cylinder.....	8 U.S. quarts
Crankcase - Refill - Six cylinder.....	7 U.S. quarts
Crankcase - Refill - Eight cylinder.....	7 U.S. quarts
Clutch - All models.....	1/3 U.S. pint
Transmission - All models without overdrive.....	2 lbs., (EP gear lubricant SAE 80 winter, SAE 90 summer)
Transmission and Overdrive.....	3-1/4 lbs., (EP gear lubricant SAE 80 winter, SAE 90 summer)
Rear Axle - All models.....	3-1/2 U.S. lbs., (SAE 90 Multi purpose gear, lubricant)

SERVICE INFORMATION

Firing Order - Six cylinder 1-5-3-6-2-4; Eight cylinder 1-6-2-5-8-3-7-4
Spark Timing - Breaker points open - top dead center - all models
Spark Plugs - Champion H8 - H11 for Model 7B
Spark Plug Gap - .032"
Breaker Point Gap - Six cylinder .020"; Eight cylinder .017"
Tappet Clearance - Six cylinder - hot - intake .008", exhaust .010"
Tappet Clearance - Eight cylinder - hot - intake .008", exhaust .010"

Rear Axle - First Series

GROUP PARTS BOOK Revision Sheet

Date
9-22-52

S-318

The four page attachment to this Revision Sheet covers Section B of your 1952 Group Parts Catalog.

It lists the rear axle Service Parts in their respective groups and includes two new Second Series Axles now being used in production.

The 4 1/10 to 1 Axle has been replaced by the 4 1/11 to 1 Axle and the 4 5/9 to 1 Axle has been replaced by a 4 6/11 to 1 Axle. Both may be identified by the cover bolted to the rear of the axle as in the case of the 3 1/14 to 1 Axle used on cars equipped with Dual-Range Hydramatic Transmission.

The illustration numbers on the attachment refer to illustrations in your 1952 Group Parts Catalog of which this attachment should be made a part.

C. J. Perrin
Parts Specification Division

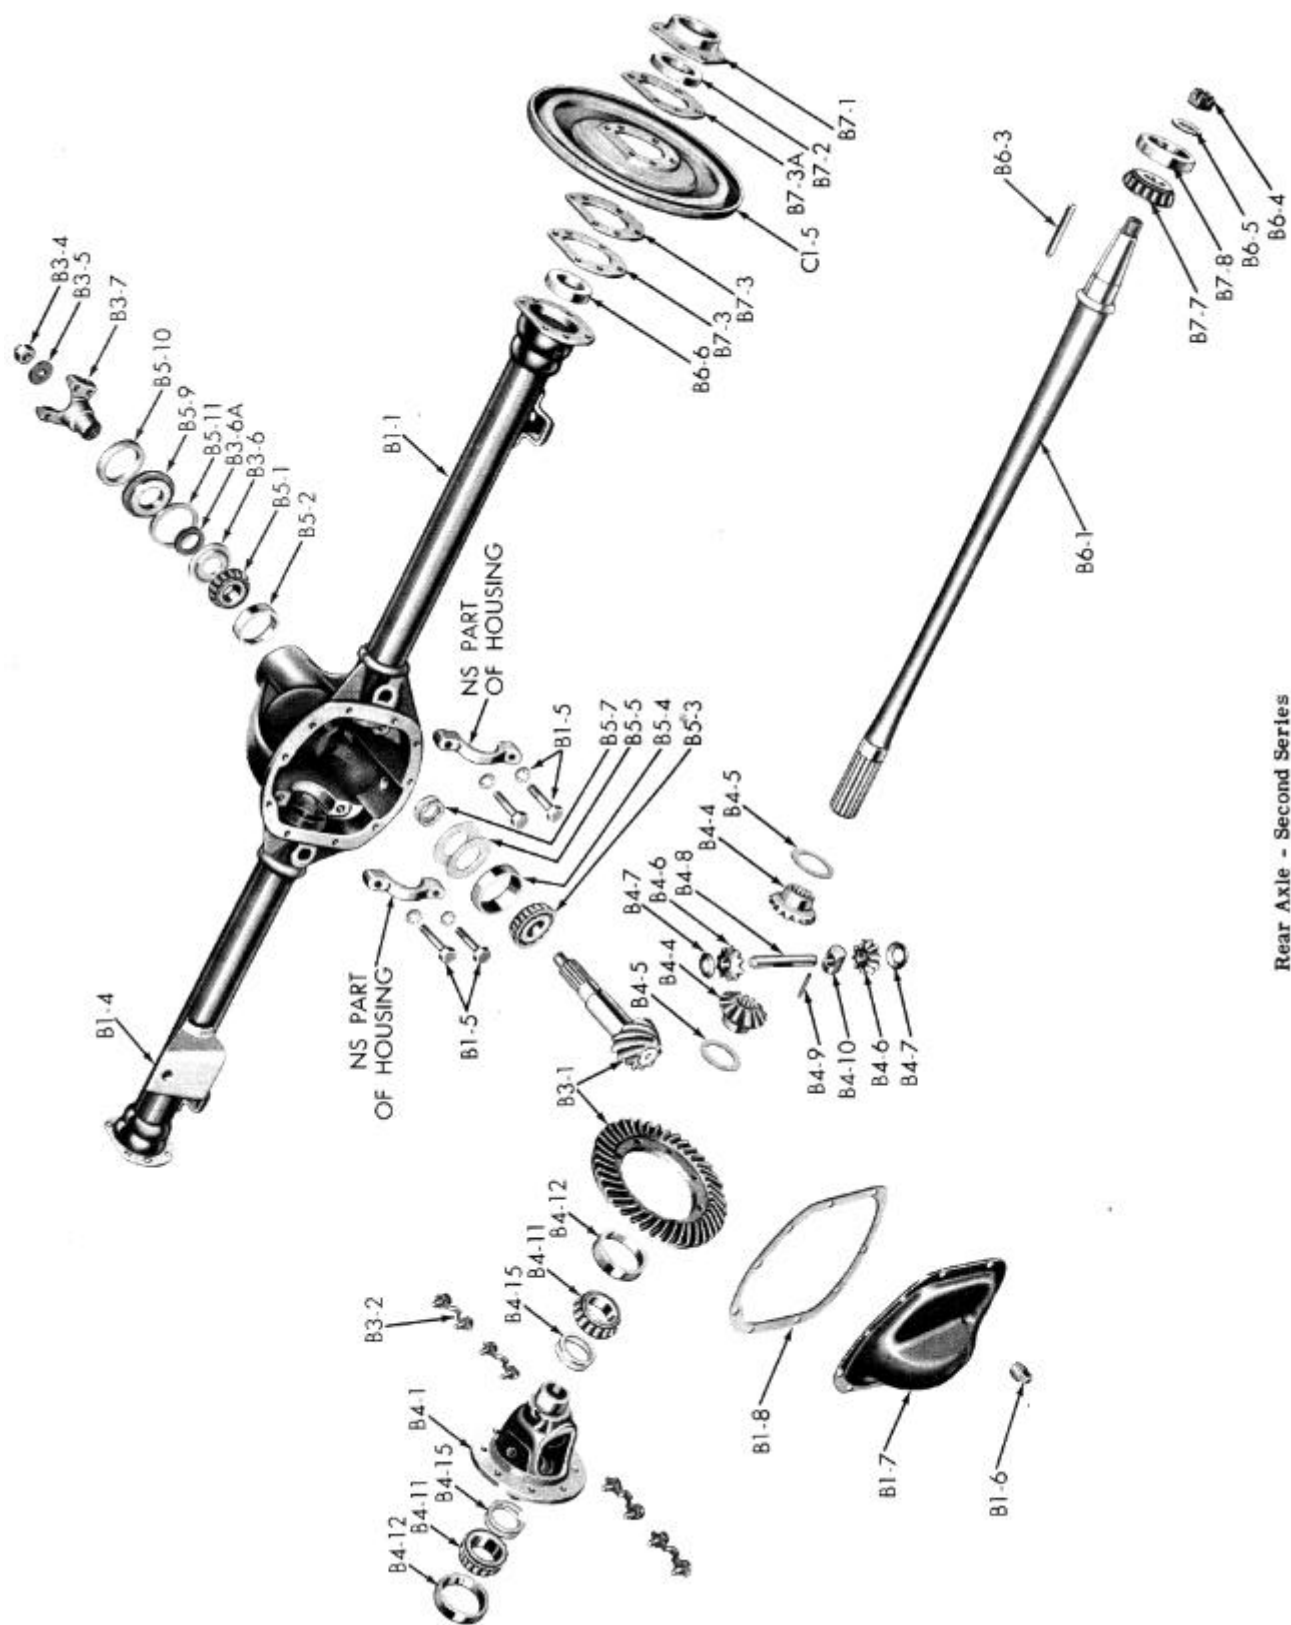

Group & Illus. No.	Illus. No.	Part No.	Name	Per Car	Models	
B1			Two types of Axles were used for the 1952 Models. First series axles were supplied in Gear Ratios 4 1/10 to 1 (4. 10) 4 5/9 to 1 (4. 55) and 37/12 to 1 (3. 58). Second series axles are supplied in ratios 3 1/14 to 1 (3. 07), 4 1/11 to 1 (4. 09) and 4 6/11 to 1 (4. 55). The second series axles are identified through their type of construction, having a cover bolted to the rear of the axle instead of welded as in the first series. Standard and Optional Gear Ratios follow: Models Std. Opt. Opt. 4B, 5B, 6B, 8B (H) 4 1/10 4 5/9 less OD-HT (P) 4 1/11 4 6/11 4B, 5B, 6B, 8B (H) 4 5/9 4 1/10 with OD (P) 4 5/11 4 1/11 7B (H) 4 1/10 4 5/9 3 7/12 less OD-HT (P) 4 1/11 4 6/11 7B (H) 4 5/9 4 1/10 with OD (P) 4 6/11 4 1/11 4B-5B-6B-7B-8B with H51 or J51 HT (H) 3 7/12 4B-5B-6B-7B-8B with H52 or J52 HT (P) 3 1/14 Dual Range Hydra-Matic Transmission requires 3 1/14 to 1 Gear Ratio. (H) First Series (P) Second Series HD Heavy Duty Ratios of first series axles identified by numbers 1/10-5/9-7/12 stamped into the front face of the carrier. Ratios of second series axles identified by tag attached by axle cover bolt 4 5/11 for 4 1/11 to 1, 50/11 for 4 6/11 to 1 and 43/14 for 3 1/14 to 1. B1 REAR AXLE HOUSING

F 11			F 11 SHOCK ABSORBERS		
			Summary of Shock Absorber usage Light control front shock absorbers are used with low rate front springs end light control rear shock absorbers are used with low rate rear springs. Heavy control front shock absorbers are used with high rate front springs and heavy control rear shock absorbers are used with high rate rear springs. Extra heavy duty shock absorbers are optional on all passenger cars.

Group & Illus. No.	Illus. No.	Part No.	Name	Per Car	Models	
K1-			K1 TRANSMISSION ASSEMBLY & CASE			
			Transmissions and details shown in this group are for all Models not equipped with Hydra-Matie Drive. Hydra-Matic Transmission and details shown in Group K23.			
			Two types of manually controlled transmissions are used in the 1952 Models. The first series is the same as used since 1941. The second series employs separate shift shafts and two rods from the control tube to the transmission.

K-23			K23 HYDRA-MATIC TRANSMISSION			
			Hydra-Matic Transmission effects parts in Groups C10, C13, G1, H1, H6, H11, J2, K8, L1, N6, R8, Si, 310, JJ3 and JJ6.			
			The letters HT used throughout this book in the Model column indicate Hydra-Matic Transmission.			
		C 305692	Hydra-Matic trans assy-Model H51	8613125	1	5B,6B,7B,8B
		C 306519	Hydra-Matic trans assy-Model H52	8614225	1	4B,5B,6B,7B,8B
			All 262 cu. in. engines require H51 or H52 Transmission.			
		C 306141	Hydra-Matic trans assy-Model J51	8613841	1	4B
		C 306518	Hydra-Matic trans assy-Model J52	8614255	1	4B
			J51 or J52 Transmissions used only with 232 cu. in. engine.			
			To insure procurement of correct parts obtain Model number (precedes transmission serial number) of transmission and use Model column in this Group.			
			Transmissions on 306518 and 306519 are Dual Range

HUDSON PART BM 303101, MODEL 4B

1-683S	—Body flange assembly		75-712	Metering rod-1 size lean—.075"-.075" to .0675"-.043"	
1A-21	Flange gasket		-75-713	Metering rod-2 sizes lean—.0755"-.0755" to .069"-.046"	
2-138	—Throttle valve		75-714	Metering rod-3 sizes lean—.076"-.076" to .0705"-.049"	
3-679S	—Throttle shaft and lever assembly		75-715U	Unitized package (Consists of 75-713 and 75-714)	
6-410S	Air horn and piston housing assembly		86-15	Flange stud lock washer	(2)
6-659S	—Air horn assembly		101-26	Coil housing attaching screw	(3)
7-107	Choke valve		101-28	Throttle shaft arm clamp screw	
11-165S	Low speed jet assembly		101-78	Choke lever clamp screw	
119-41	Rivet plug		101-81	Fast idle cam screw	
11B-62	Body flange rivet plug		101-120	Throttle lever adjusting screw	
11B-79	Rivet plug	(5)	101-143S	Piston housing attaching screw and washer assembly	
11B-108	Idle port rivet plug		101-147S	Body flange attaching screw and washer assembly	(2)
11B-117S	Idle passage plug and gasket assembly		101-148S	Bowl cover attaching screw and washer assembly	(5)
11B-119S	Ball retainer screw plug and gasket assembly		101-151S	Air horn attaching screw and washer assembly	(2)
11B-127S	Passage plug and gasket assembly	(2)	105A-13	Flange nut	(2)
11B-130	Nozzle retainer plug		114-42S	Throttle shaft arm and screw assembly	
12-280S	Nozzle assembly		115-122	Throttle connector rod	
14-222S	Choke piston lever, link and shaft assembly.		116-13	Pump intake and discharge check ball	(2)
14-406S	—Choke lever, screw and link assembly		117-58	Pump connector link	
15-35S	Strainer nut and gasket assembly		117-66S	Piston link and spring assembly	
20-22	•Gasket	(3)	118-28	Dust cover	
20-26	•Gasket	(3)	120-15S	Metering rod jet and gasket assembly	
20-35	•Bowl strainer gasket		121-51	Air horn gasket	
20-45	Nozzle gasket		121-58	Bowl gasket	
21-76S	Float and lever assembly		121-72	Body flange gasket	
24-15	Float lever pin		121-74	Coil housing gasket	
25-75S	Needle and seat assembly		129-15	Metering rod disk	
30-14	Bowl strainer gauze		146-88S	Bowl cover assembly	
30-35	Pump strainer		150-62	Choke piston pin	
30A-39	Idle adjustment screw		150-92	Anti-percolator pin	
39-10	Choke valve attaching screw	(2)	150A-10	Pin spring	(3)
39-11	Throttle valve attaching screw	(2)	160-67S	Vacuum piston and pin assembly	
48-72	Pump jet		160-75	Choke piston	
53A-199S	Pump arm and countershaft assembly		170E-64S	Thermostatic coil and housing assembly-	
61-57	Adjustment screw spring				
61-63	Pump spring				
61-75	Metering rod spring				
61-175	Vacuum piston spring				
61.188	Rocker arm spring				
61-192	Needle pull clip				
61-200	Plunger spring				
63-48	Housing retainer	(3)			
64-58S	Plunger and rod assembly (Identify by shaft No. 149-108)				
75-704	—Metering rod—standard—.0745"-.0745" to .066"-.040"				

•Gaskets so marked must be soaked in 90 proof denatured alcohol for 15 minutes. installed on part and let dry before using.

—Parts so marked are new and listed for the first time.

NOTE: Small figures in parentheses indicate number of pieces used in one carburetor. Where no figure is shown, only one is used

BODY GROUPS

At the start of the chassis section is an explanation of the chassis groups. A similar group plan is used in this body section.

For parts classification purposes, the body is divided into sixteen main sections. These sections are designated by double letters so that there will be no possibility of confusing them with the chassis sections.

The main body sections are as follows--

AA--FRONT END

JJ--FLOOR

BB--PILLARS AND HEADERS

KK--SEATS

CC--METAL PANELS

LL--REAR COMPARTMENT

DD--DOOR HANDLES

MM--INTERIOR FITTINGS

EE--DOORS

NN--INSIDE FINISH MOLDINGS

FF- -WINDOWS

PP--OUTSIDE MOLDINGS

GG- -TOP-CLOSED BODIES

TT--TRIM SECTION

HH--TOP-CONVERTIBLES

UU--PAINT AND LACQUER

See further explanation of the body grouping system on the following pages.

DIVISION OF GROUPS

The main body sections shown on the preceding page are sub-divided into small groups, each of which is designated by a number preceded by its main section letters.

The group subdivisions and the page on which each group will be found, are as follows:

		Page No.			Page No.
	AA-BODY FRONT END			JJ-FLOOR	
AA-3	Cowl side trim panels	174	JJ-1	Underbody panels and silencers	209
AA-4	Cowl ventilator and control	174	JJ-3	Floor plates and covers	209
AA-5	Dash panel group	175	JJ-4	Door scuff plates	211
AA-6	Instrument panel group	176	JJ-5	Seat trays	211
AA-8	Toe board riser	176	JJ-6	Floor carpets and pads	212
AA-10	Windshield	176

This illustration is provided for your guidance in the use of correct nomenclature for Trim or Trimmed Parts on orders placed with your Zone or Distributor.

When ordering trim or trimmed parts be sure to include the car serial number, body type and any other information that will assist in the prompt procurement of the correct item or items.

INSTRUCTIONS FOR ORDERING UPHOLSTERY AND TRIMMED PARTS

Interior trim and upholstery parts may be Special Ordered through Hudson Dealers.

Responsibility for specifying the correct Car Serial Number and describing the upholstery or trimmed part rests entirely with the Hudson Dealer placing the order.

To assist in arriving at the correct description please use Illustration No. 32 on the opposite page.

Unless correct Car Serial Number and proper description are used the Dealer may receive incorrect material with resultant loss in time and money. Special Order items are not returnable.

The factory cannot guarantee to match exactly the shade of upholstery. This is due to variations in shades which occur from roll to roll of material. Weave and texture of materials will be the same, but the shade of color may vary.

1952 UPHOLSTERY

Cloth Trim

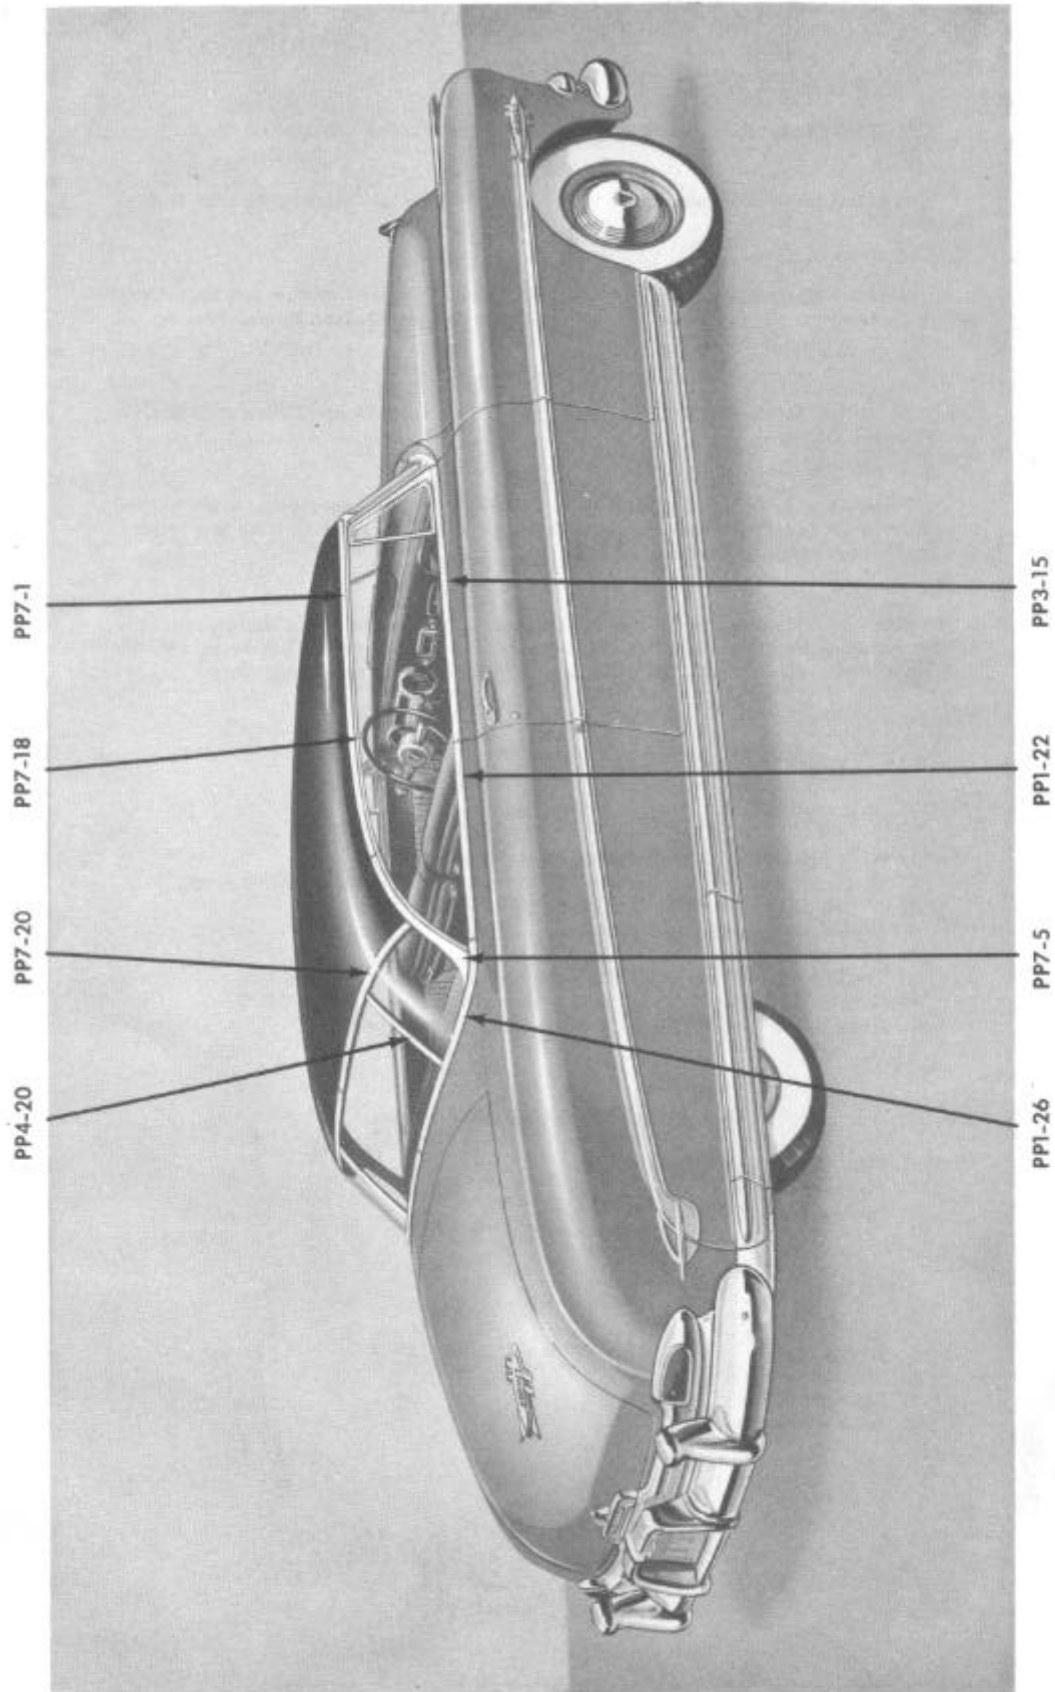

1. Gray cord cloth with brown and red stripes.
2. Tan cord cloth with brown and red stripes, with solid tan cord cloth.
3. Brown and tan striped cord cloth, yellow pin stripe.
4. Brown and tan striped cord cloth.
5. Tan Nylon with brown stripe.
6. Tan Nylon with a brown stripe, yellow pin stripe.
7. Gray Nylon with light and dark blue stripes, green pin stripes.
8. Gray Nylon with light blue stripes, green pin stripes.

COMBINATION LEATHER TRIM

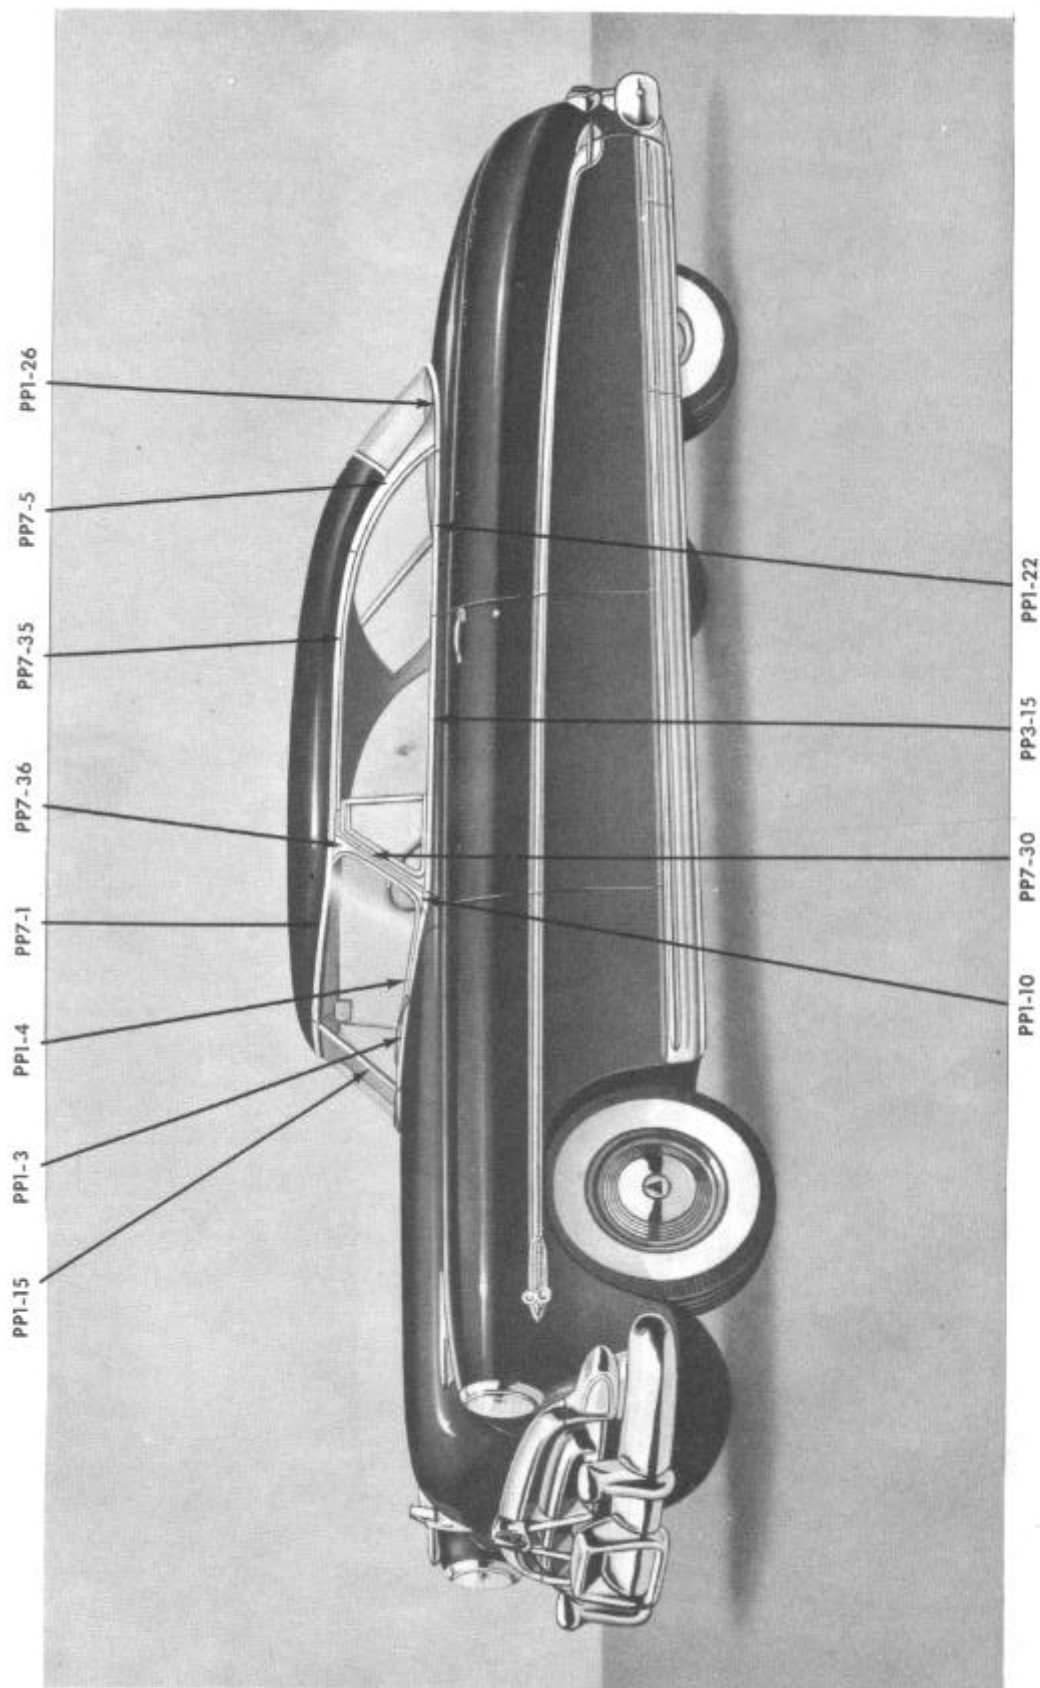

1. Blue and Gray leather.
2. Maroon and Gray leather.
3. Brown and Gray leather.

SOLID LEATHER TRIM

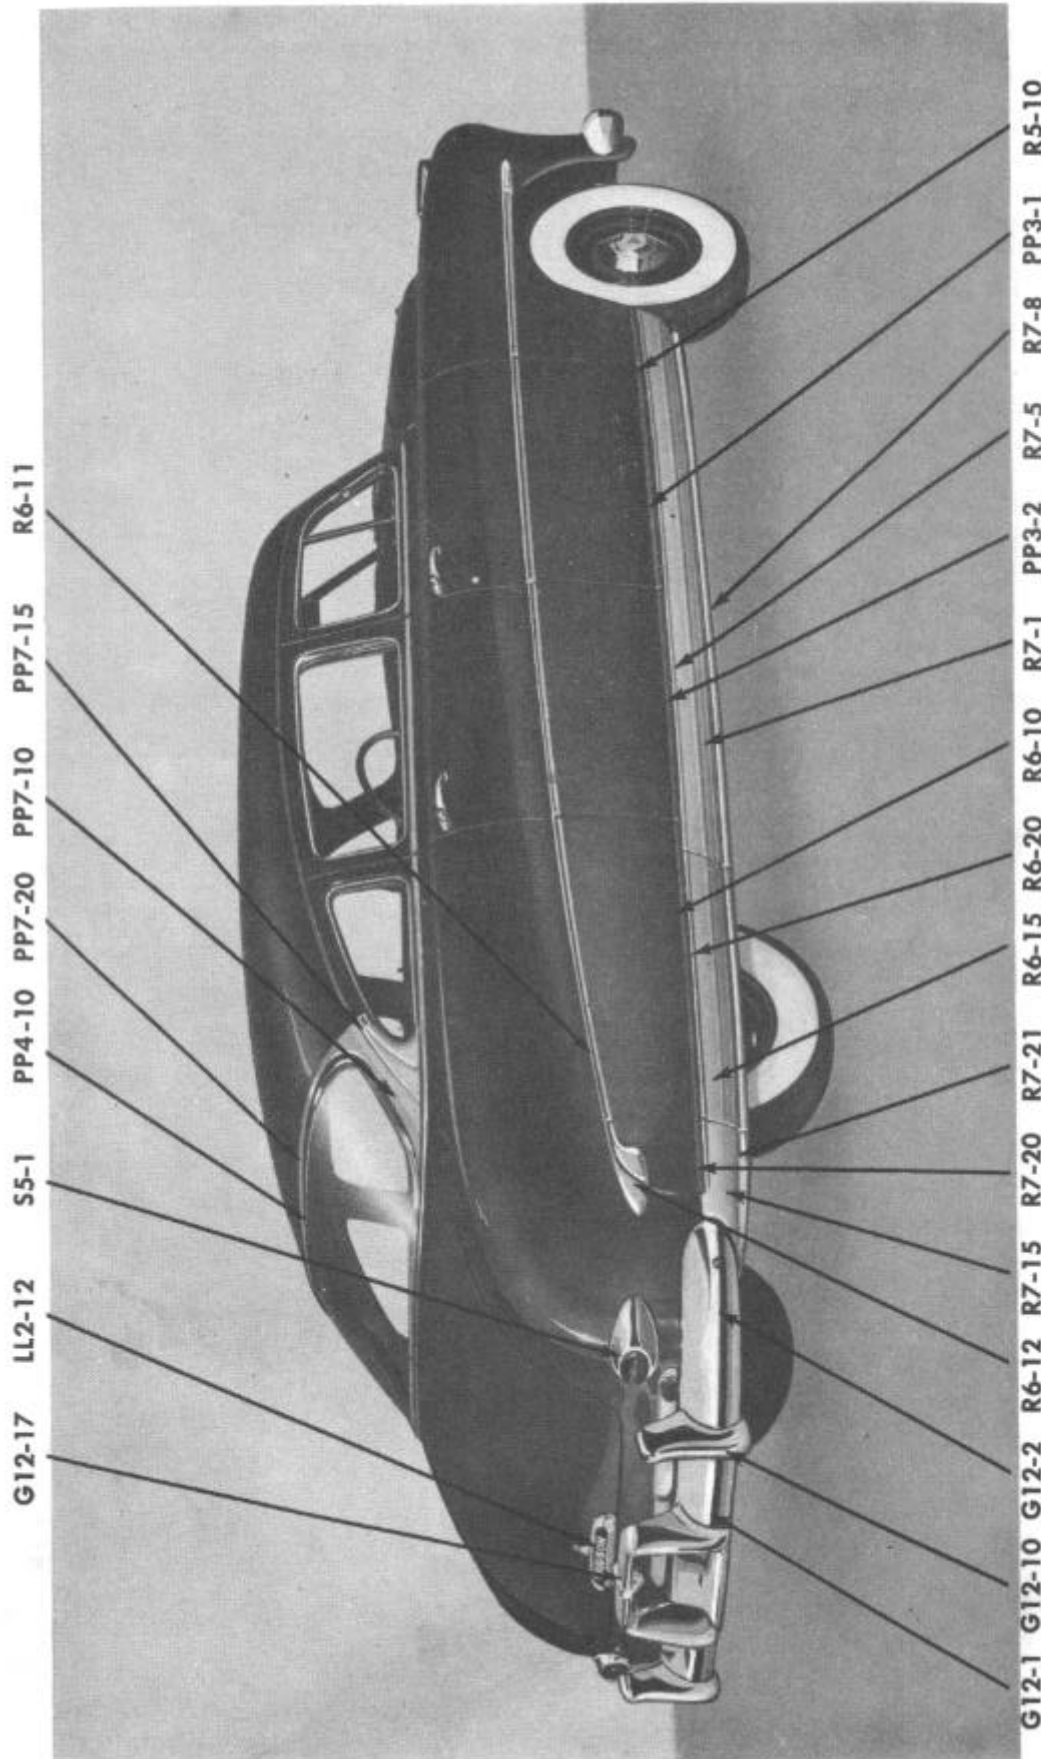

1. Brown leather
2. Maroon leather
3. Blue leather
4. Dark Red leather

UU1 EXTERIOR FINISHES

The exterior finish of "B" Series is identified by a Code Number which is stamped on the body half of the right front door upper hinge. One number is assigned to one color, or Two Color combination, and will always identify that color or combination only.

Use part number and color name when ordering.

Body Lacquer Pint	Body Lacquer Quart	3 oz. Touch-up	Wheel Enamel Paine	Name	Code No.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1998, compared with 1.2 million in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In the 19th century, the public sector employed people with disabilities in a number of different roles, including as clerks, typists, and stenographers. In the 20th century, the public sector continued to employ people with disabilities, and in the 1990s, the number of people with disabilities employed in the public sector increased significantly.

Another reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of advantages over the private sector. One advantage is that the public sector is not subject to the same level of competition as the private sector. This means that the public sector can often offer better pay and benefits than the private sector. Another advantage is that the public sector is often more flexible in its hiring practices than the private sector.

There are also a number of disadvantages to working in the public sector. One disadvantage is that the public sector is often more bureaucratic than the private sector. This means that it can be more difficult to get things done in the public sector. Another disadvantage is that the public sector is often more subject to political interference than the private sector. This means that the public sector can be more difficult to work for if you are not a member of the political establishment.

Despite these disadvantages, the public sector remains an important employer of people with disabilities. This is because the public sector has a number of advantages that the private sector does not have. One advantage is that the public sector is often more flexible in its hiring practices than the private sector. This means that the public sector can often hire people with disabilities who would not be able to find work in the private sector.

Another advantage is that the public sector is often more subject to political interference than the private sector. This means that the public sector can be more difficult to work for if you are not a member of the political establishment. However, the public sector remains an important employer of people with disabilities because of its long history of employing people with disabilities and its advantages over the private sector.

In the future, it is likely that the public sector will continue to be an important employer of people with disabilities. This is because the public sector has a number of advantages that the private sector does not have. One advantage is that the public sector is often more flexible in its hiring practices than the private sector. This means that the public sector can often hire people with disabilities who would not be able to find work in the private sector.

Another advantage is that the public sector is often more subject to political interference than the private sector. This means that the public sector can be more difficult to work for if you are not a member of the political establishment. However, the public sector remains an important employer of people with disabilities because of its long history of employing people with disabilities and its advantages over the private sector.
