1949	300000 C 29				CWC
1950					
1951					
1952	304300 C 252				CWC
1953					
1954					

<sup>1</sup> **NOTE:** Compiled from data collected by Hudson-Essex-Terraplane club member Rick Pinder

<sup>2</sup> To translate Casting Codes - Dates are determined by the last digits - thus D122 translates as April 12th 1942 or 52. C234 is March 23rd, 1954. **(Single digit for year)**  
Month is determined by the first letter - A = Jan., B = Feb, C = Mar., D = Apr., etc.  
This is true for all CWC (Campbell Wyant and Cannon) engines. The "unknown" foundry uses the full date, 1-15-54 no code involved.

<sup>3</sup> Translation of date codes = MO/DAY/YEAR

This chart will be updated as more data is obtained.
